"Recensione ?The romance between Sarah and Andrew is what first love is meant to be. A fine summer fling for a satisfying summer read.? (Kirkus Reviews)?With its themes of confidence and discovering one?s true self, this summer romance is a great choice for teens.? (School Library Journal) Dalla quarta di copertina *It's easy to watch the world from afar. But to fall in love you have to live in it.* Ever since Sarah was born, she's lived in the shadow of her beautiful older sister, Scarlett. A budding astronomer, Sarah's days are devoted to math club and the boy she's loved since kindergarten, Tucker. Her nights are spent observing the vast universe through her Stargazer 5020. Then Tucker breaks Sarah's heart, and she goes to Cape Cod for the summer with her family, ready for something big in her life to change. She doesn't want to live in the shadows anymore. She wants to be someone who shines. Someone like Scarlett. She doesn't expect to meet Andrew. Gorgeous, college boy Andrew. Andrew pulls Sarah out from behind her telescope. He sees the girl she wants to be. For Sarah, it's a summer of firsts. A summer of blazing comets and shooting stars. Before she knows what's happened, one little lie has transformed into something real. And by the end of August, she might have to choose between falling in love and finding herself. L'autore Rebecca Maizel hails from Rhode Island, where she teaches literature at her alma mater the Wheeler School. She tries not to force her students to read her books, though. Rebecca is the author of several published novels for young adults, and recently received an MFA in Writing for Young Adults from Vermont College of Fine Arts."

The connection between the moon cycles and your mood noticing that the water has a direct energy field like ours and how the moon shows us that we are too a solar body and that we need to look at our moon ca
